

A REVOLUTIONARY ROOF TRUSS CONCEPT

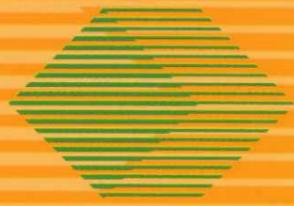

Strong

Stable

Secure

Bestweld

Bestweld

Bestweld Steel System has earned the reputation of market leader in the steel industry, for its products designs and innovations, and its attentive ears to customers' needs. They are constantly developing new research methodologies and adopting the latest in Australian steel-making technology to improve and customise product designs to suit industrial needs. You can be assured of superior quality products that are compliant with the international standards.

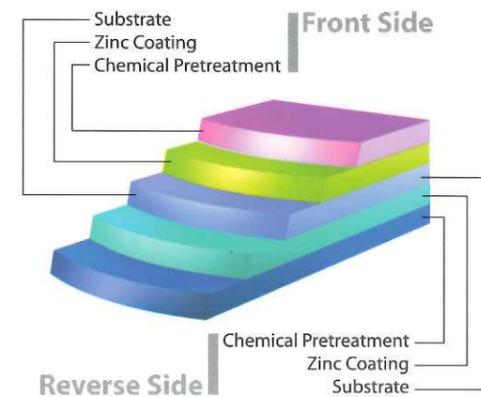

Bestweld Galvanised Steel Truss For many years, Bestweld Steel System has been the soul of modern architectural structures. Its superiority stems from a strong, yet lightweight zinc coating, termite-resistant, non-combustible steel that offers structural integrity and durability that will outline your expectations and the lifespan of your building.

Computerised Design

- Cad-like In-house computer software
- Component are all high tensile steel with minimum yield strength of 550 mpa
- Meet various design standards
- Cold Form Steel Structure Code, AS 4600 - 1996
- The Building Code of Australia
- Fast & Flexible

Quality Assurance

- All components are zinc/aluminium alloy or zinc coated
- High tensile steel with minimum yield strength of 550 mpa
- Fabrication & erection done by skilled worker

Anti-Corrosion

- Up to 10 years manufacturers warranty on raw material
- Zinc/Aluminium acts as sacrificial anode to protect the steel edge by sacrifice itself
- Meet standard of AS1397 or Jis G3302

The Advantages

Strong, Reliable, Durable

Corrosion Resistance
Won't shrink, warp, crack, sag or rot

Termite and White Ant Proof
Cost saving on chemical treatment

Level Ceilings

No Leakage
Roof top supported by strong steel truss, this may prevent distortion and leakage

Maintenance Free

Fast & Easy Installation
Due to its light weight & flexibility, therefore easy to shift and fix

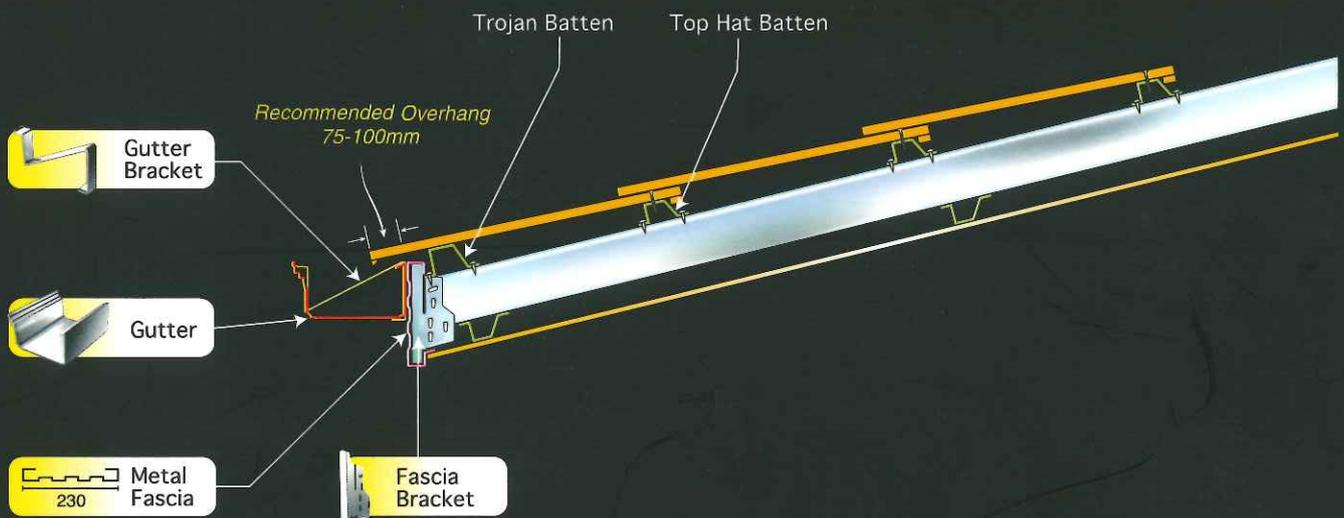

Certified
As non-combustible by BOMBA

BESTWELD Steel System is the **one-stop** shop for your complete building requirements

- Fully engineered to AS 4600
- In-house building design and calculations
- Complete package supply
- 100% galvanised and no on-site painting
- Attractive finish
- Lightweight
- Flexible design options
- No need to shop around many suppliers
- Reliable high corrosion resistance
